

Trial CareDirector now from only £2,500 per month and unleash the potential of personalisation with proven technology that empowers people to take control of their lives.

- Enable the public to be in control of their own support needs with the CareDirector citizen portal
- Give social workers the power to make a difference with the CareDirector case management system
- Measure the efficiencies achieved during your trial with the CareDirector performance module
- Build an evidence-based business case for IT investment with reduced financial commitment
- Ensure that local service users and staff are satisfied with your personalisation strategy
- Demonstrate how technology accommodates cultural change for citizens and social workers
- No hardware investment required

Here's your opportunity to unleash the potential of personalisation with familiar and proven technology that works the way you do and empowers people to take control of their lives. We are offering you a trial of CareDirector for up to six months so your organisation can conduct pilot testing, prototyping and solution development to support your personalisation strategy and inform your business case for IT investment.

CareDirector Trial Offer

Typically, you can get to trial CareDirector with an unlimited number of service users and up to 20 care workers over a 3 to 6 months period. This trial offer includes:

- Implementing the CareDirector citizen portal
- Implementing the CareDirector case management system
- Implementing the CareDirector performance module
- Training and access to all training materials
- Full technical and helpdesk support
- Hosted solution – No IT investment is required!

Why choose CareDirector and CareWorks

CareDirector is a social care management system that enables the public to be in control of their own support needs. We have taken a different approach moving away from the custom applications that have traditionally been used in social care management to one built on an industry-standard customer service platform. The result is a higher quality more flexible system that can be quickly adapted to changing social care demands.

CareWorks is a social care specialist with 12 years experience, 70 local authority customers and unrivalled understanding of the revolution taking place in the delivery and management of social care. We have extensive knowledge and experience of the requirements and business processes of adult social care. We have developed relationships with key partners to ensure that we have the appropriate business and technical expertise to help your transition to personalisation. We are proud to be recognised by our customers and national partners for our ability to build positive, personal and open working relationships.
